San Ramon Valley Genealogical Society

Vol. XXXII No. 10 May - 2017

**THIS MONTH – May 16, 2017**  
**"Introduction to British Research "**  
**Presented by: Kim von Aspern-Parker**

**H**ave you hesitated in starting your research “over the pond” because you heard it can be hard? Or maybe you think it will be too different from what you are used to doing? Come learn some basics in using British Records. This is Part 1 of Ms von Aspern-Parker’s “*Over the Pond*” Series of Lectures.

Kim von Aspern-Parker has been researching her family history since the bug bit her in 1987. She actively searches for family on both her adopted line and her birth line. In addition Ms. von Aspern-Parker has worked as a professional genealogical researcher for more than 14 years. She is a member of the Association of Professional Genealogists, the National Genealogical Society, and the Genealogical Speakers Guild. Kim takes several online genealogy classes, attends webinars, and attends conferences while pursuing credentialing by the Board of Certification of Genealogists. When she is not doing genealogy research for herself or others Ms. von Aspern-Parker likes to do needlework and read.

**From the April Meeting**  
**“The Missing Man:  
Solving a Mystery with Genealogy”**

**Presented by: Sharon Hoyt    Reported By: Jean Hunt**

**S**haron Hoyt, CGSM, is an award winning, full time genealogy researcher who specializes in helping clients whose ancestors migrated to California and she also has a Master’s Degree in Library and Information Science.

Sharon shared great research techniques stressing strategies that will help you overcome long standing brick walls.

We were very lucky having this speaker as she has provided us with a four page “Handout” full of *How-to’s* and *Reminders* that will please the hearts of most genealogy researchers whether they be newbies or very experienced.

Using her prize winning article “*The Mysterious Disappearance of August Henry Lawrence of Winthrop, Minnesota*”, she set out to find him.

After validating the family’s research ►

## Sharon Hoyt

she set out to find out everything she could about August. Using a spreadsheet she searched Family Search and Ancestry learning how to use most of the bells and whistles in their collections. She studied all sorts of maps: historical, Bureau of Land Management, Land Office Records etc.

As her spread sheet filled up she continually analyzed.

Along the way her researching dug up another August with spelling differences. The same August or a different August? At this point she re-evaluated August's FAN (Family, Associates, and Neighbors) club. The results from this move caused her to re-visit Family Search, Ancestry etc. to widen her searches. Yes, they often gave her the same answers but also different answers, which can be most helpful.

It took Sharon two hundred hours but she did find August. He was found in an adjoining County. He had seemingly returned to the people who had adopted and raised him where, sadly he took his own life.

Sharon believes in conducting reasonably exhaustive searches but the work is well worth the results you receive and the documentation you have to prove it. ■

## President's Message

*By Ted Shapas*

The quality of our genealogy work is very much a function of how well we accumulate and assess data (finding and analyzing sources), test hypotheses (does my idea fit with credible evidence?), and make inferences (this is surely my great-grandfather!). So in many ways, we are like journalists and scientists, whose careers depend on accurately portraying the results of their investigations. Just like the majority of journalists and scientists, most genealogists are good ones, mixed in with a few careless or forgetful ones, and a scant few who deliberately fib (and generate a type of genealogical "fake news").

As many of you likely know, sets of genealogical standards and guidelines have been established to help us understand best practices, avoid mistakes, and become better at what we do. Perhaps the most comprehensive ones come from the National Genealogical Society (NGS) and Board of Certification for Genealogists (BCG). From newbies to those who have been working on genealogy for years, it's a worthwhile exercise to read or revisit these standards. Here is a link to standards from the NGS: [https://familysearch.org/wiki/en/Genealogical\\_Standards\\_and\\_Guidelines\\_\(National\\_Institute\)](https://familysearch.org/wiki/en/Genealogical_Standards_and_Guidelines_(National_Institute)) For a more in-depth treatment, particularly useful if certification is your goal, see those from BCG: [https://www.amazon.com/Genealogy-Standards-Board-Certification\\_Genealogists/dp/1630260185/ref=sr\\_1\\_1?s=books&ie=UTF8&qid=1492900892&sr=1-1](https://www.amazon.com/Genealogy-Standards-Board-Certification_Genealogists/dp/1630260185/ref=sr_1_1?s=books&ie=UTF8&qid=1492900892&sr=1-1) Adherence to such standards can be part of your own personal genealogy plan, or as a means to realize the promise of the old French mantra: "every day and every way, I'm getting better and better"! ■
